

Two days to strengthen my impact as an executive

A strategic investment in myself.
Tangible value for our company.

A more complex role. A need to step back.

As an executive, I am accountable for my area of responsibility, while also contributing to decisions that affect the entire company. With AI, revenue models, cybersecurity, talent and growth making decisions more complex and interconnected, it is essential to step back, test my thinking and learn from peers facing similar challenges.

Vision Leadership gives me two days to step away from day-to-day operations, connect with other technology executives and return better equipped to contribute to our company's priorities.

An experience designed for today's executives

**Meaningful
conversations**
with peers

**Practical, timely
content** on the
issues that matter

**Diverse
perspectives** to
support better
decisions

**Insights I can
apply** in my
company

What I gain... and what it brings to the company.

In my role	Vision Leadership helps me...
Decide	Test my choices against other perspectives before taking action
Anticipate	Get ahead of issues that will affect our company
Contribute	Broaden my perspective beyond my own function and enrich the executive team's decisions
Challenge	Compare our practices with those of other technology companies
Act	Return with ideas and approaches we can adapt to our reality
Connect	Build a network of peers with whom I can continue exploring key questions

their colleagues

"Vision Leadership is one of the rare opportunities during the year when you actually take the time to look up from the day-to-day. The content is substantial, and the conversations with other participants even more so. I came back with perspectives I wouldn't have developed on my own."

Maxime Larose
VP Sales,
Genius Solutions
